

Project Initialization and Planning Phase

Date	27 June 2026
Team ID	
Project Name	Rising Waters
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A meteorologist or disaster management authority..	Issue timely, localized, and highly accurate early flood warnings.	Traditional meteorological forecasting models often fail to capture complex feature correlations in time.	Historical weather features and data preprocessing are not tightly integrated into a real-time system..	Concerned about community safety and limited response time.
PS-2	A disaster relief coordinator during active monsoon seasons	Monitor multiple high-risk regions simultaneously to prioritize emergency resource deployment.	Existing reporting is fragmented and lacks instant risk classifications.	There is no intuitive visual dashboard connected directly to optimized predictive models	Stressed by the lack of dynamic, actionable data during an emergency.
